

How To Use

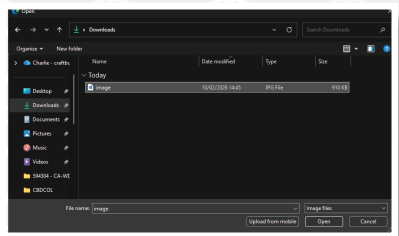

1 Go to **www.crystallise.me** and select the colour of the kit you have purchased.

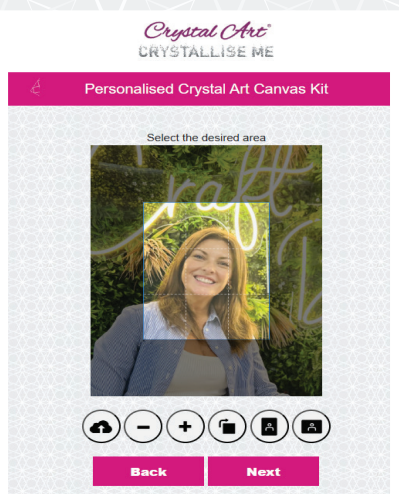

2 Upload your image in .jpeg or .png format. It must be less than 15MB in file size.

3 Click the yellow upload button. This will then prompt you to choose your image from your device. Select the image you would like to use and press open.

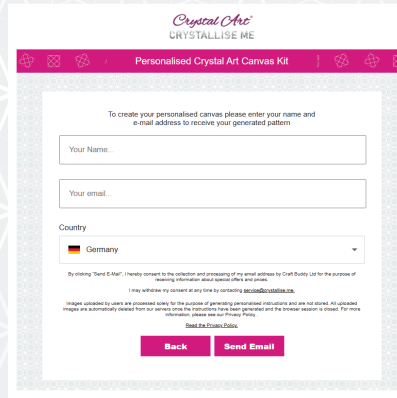

4 This is where you finalise the image for your canvas, by using the 6 buttons that appear on this page. The button with the cloud: allows you to upload a different image if you change your mind. The + and - buttons allow you to zoom in and out of your image. The button with a square and an arrow rotates the image. The last two buttons allow you choose the orientation.

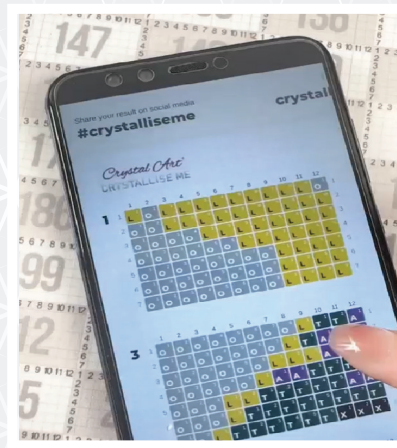

5 Once you are happy with your image, press next. Use the options along the bottom to select your preferred finish result.

6 Enter your name, email address and country of residence. After entering these details, you will be emailed a PDF with your generated pattern that you can follow to fill your canvas with crystals. You can either view this PDF on a device, or you can print it out.

7 The numbered boxes on your canvas correspond to the left hand number on your pattern sheet.

8 Lift up the film covering the red wax, and push pick up pen your pen into the wax.

9 Choose a crystal colour to start with and pour some crystals into a tray. The front of the crystal is faceted. Gently shake the tray to get as many as you can facing up. Pick up a crystal (facet-side up) using the pen - it will stick to the wax in the pen.

10 Use the PDF photo pattern to place the crystal on your template in the correct place - the crystal will stick to the adhesive layer. Continue until your design is complete or replace the film to save for later. Use the storage bags to store loose crystals.
